DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Perez'995.

The Perez'995 reference discloses a dispensing syystem comprising a flexible package C and a receiver apparatus 15.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers'988 et al. in view of Van Der Heijden.

The Rogers et al. reference discloses a dispensing system comprising a receiver apparatus 30 and a flexible package 104 with associated carton 100 with openable portion 110, but does not disclose a handle. The Van Der Heijden reference discloses another dispensing system having a flexible package with a carton that includes handle portions in the carton (see Figs. 5-8) to facilitate ease of handling the flexible package. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the carton to have handle

portions in view of the teachings of the Van Der Heijden reference to facilitate ease of handling the flexible package.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Sheyer and Stern references pertain to other dispensing systems with receiver devices that penetrate flexible packages, and the Tschanen reference pertains to a carton/bag arrangement with carton handles.

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-19 are allowed.
